

PEST-O-FLASH®

While they may not be menacing, a swarm of flies or flying pests can be a major source of nuisance. Especially during the monsoons, when they tend to flock in large numbers. Be that as it may, a few types of flies additionally transmit an extensive variety of infections including dysentery, tuberculosis, cholera and parasitic worms. Swatting these pests away can get quite cumbersome, not to mention their presence reflects poorly on the establishment. PCI brings you Pest-O-Flash®, an electric flying insect-control system which lures these pesky flying insects in a protected non-toxic, efficient and consistent manner.

- ✓ POF-2T with 2 standard lamps of 15 W, UVA.
Dimensions: 57cms (L) x 15.5 cms (W) x 28 cms (H)
Weight: 6.2 Kgs.
Power consumption: Approx. 55 Watts.

- ✓ POF-4T with 4 standard lamps of 15 W, UVA.
Dimensions: 57 cms (L) x 15.5 cms (W) x 34 cms (H)
Weight: 8.5 Kgs.
Power consumption: Approx. 85 Watts

AESTHETIC:

- ✓ ATTRACTIVE DESIGN
- ✓ COLOUR OPTIONS : BLACK & WHITE AVAILABLE
- ✓ STAINLESS STEEL PROTECTIVE GRILL AND GRIDS FOR CORROSION-FREE LONG LIFE
